## PROFESSIONAL SUMMARY

Full Stack Java Developer with 4+ years of experience building enterprise applications using Java, Spring Boot, Microservices, REST APIs, Angular/React, and SQL. Experienced in distributed systems, Kafka, Redis, Docker, API integration, debugging, and automated testing with JUnit/Mockito. Also worked extensively with SAP CAP, SAP Fiori/UI5, SAP BTP, and HANA on large-scale SAP Ariba applications, contributing across backend, frontend, integration, and customer-facing production support.

## EXPERIENCE

### Associate Developer

SAP LABS

Aug 2022 — Present

Bangalore

- **SAP Ariba Procurement - Master Data Application (MDApp/MDCS)** : Contributed to SAP's multi-tenant Master Data Application for Ariba Procurement, comprising a SAP Fiori/UI5 frontend, MDA Portal Backend, and Java/Spring Boot & CAP-based MDCS services that integrate master data from SAP S/4HANA, MDI/OneMDS, and file uploads, validate and transform it, persist it in CAP-MDCS/HANA, and expose it through publish, search, and metadata APIs.
- **Backend Development & Microservices**: Developed 50+ inbound master-data entities across Java/Spring Boot, CAP-MDCS, Publish, Search and MDCS Client services, implementing JSON schema validations, MDI-MDNI-ODM transformations, CDS models, business validations, status/scope verification and Eureka-based microservice integration; implemented file-upload workflows for 30+ entities and dynamic metadata for 40+ entities.
- **Frontend Development**: Enhanced Freestyle SAP Fiori/UI5 applications with search, filtering, layout persistence, file-upload flows, dynamic instruction-sheet generation and object-page functionality; resolved 20+ UI defects including 20+ accessibility issues and gained hands-on experience with Fiori Elements, XML templating, MVC, message handling, side effects, IAppState and Fiori annotations.
- **Customer & Production Support**: Investigated 40+ internal and customer incidents through BCP/IMS and ServiceNow, troubleshooting provisioning, master-data replication and integration issues across MDApp, SAP S/4HANA and SAP BTP using logs, request/response tracing and root-cause analysis; collaborated directly with customers across Germany, USA and China through troubleshooting calls.
- **Testing & Quality**: Increased JUnit coverage by 5% by writing 10,000+ lines of tests using JUnit and Mockito; validated backend business rules, status/scope logic and Java-based validations while resolving 30+ backend defects.

## EDUCATION

### Vivekananda Institute Of Professional Studies, GGSIPU

BCA, Computer Applications, CGPA : 9.54

Aug 2019 — Present

New Delhi, India

### BITS Pilani

M.Tech, Software Engineering, CGPA : 8

Aug 2022 — Jul 2026

WILP

### Chandigarh University

MBA, Dual Specialization - DataScience & AI, FinTech

Aug 2026 — Present

Chandigarh University Online

## SKILLS

**Languages & Frameworks**: Core Java, JavaScript, TypeScript, HTML, CSS, Spring Core, Spring MVC, Spring Boot, Angular, React

**Backend & Testing**: Microservices, REST, JSON, WebSockets, Kafka, Redis, JUnit, Mockito, Postman, Bruno, Swagger, SonarQube

**Databases**: MySQL, PostgreSQL, SQLite, OpenSearch

**SAP Technologies**: SAP Fiori/UI5, SAP CAP, SAP BTP

**DevOps & Tools**: Git/GitHub, Docker, DBeaver, Jenkins, Maven, Linux

## PROJECTS

### Stock Metrics

[Project link](#) [GitHub](#)

- Personalized agentic recommendation engine — recommendations depend on the user's income, expenses, assets, liabilities, emergency fund, risk appetite, goals, liquidity needs, portfolio fit, and life stage, combined with DCF, sentiment, fundamentals, and technical signals.
- Beginner + Pro modes— beginners get simplified explanations of financial metrics, while advanced users get valuation models, derived metrics, factor scoring, and risk diagnostics.
- Multi-market in one platform — U.S. stocks, Indian stocks, and Indian mutual funds are analyzed in the same application

**Technologies**: TypeScript, Next.js, React, Tailwind CSS, IndexedDB, Firebase

### LogFlow — Distributed Log & Incident Analysis Platform

[Project link](#) [GitHub](#)

- Built a microservices-based log analysis platform for log ingestion, normalization, correlation, incident detection, and failure-origin analysis.
- Implemented Kafka-driven asynchronous processing with PostgreSQL, OpenSearch, Valkey, and Docker for scalable search, caching, and deployment.

**Technologies**: Java, Spring Boot, Microservices, Kafka, PostgreSQL, OpenSearch, Valkey, Docker

### Portfolio Website

[Project link](#) [GitHub](#)

Developed a portfolio website with interactive elements, including a command-line terminal and animated developer-themed visualizations.

Implemented smooth animations, responsive layouts to deliver an engaging experience across devices.

**Technologies**: React, Vite, Framer Motion, Three.js

## INTERNSHIPS

### QA-Solvers : Subject Matter Expert

Jul 2020 — Oct 2020

Created 90+ doubt solving videos on Web Development, Python, Java, MySQL for bartleby platform.

### Shriram Pistons & Rings Ltd : Java Developer

Jul 2021 — Sep 2021

Developed backend functionalities using Java, JDBC and implemented schemas, ensuring efficiency and reliability in data management.

## ROLES & RESPONSIBILITIES

- Delivered training to 120+ freshers through an intensive 5-day workshop on Java and Spring Boot.
- Hosting : Hosted a panel discussion at Placement Officer's Meet 2023, Hosted Women's Day 2023
- Volunteering: Volunteered for Innvent for Customer Event 2024, Volunteered for SAP Inside Track (SIT) 2023 & 2025.
